SUMMARY

Computer Science student with strong analytical and problem-solving skills, experienced in developing software applications and technical solutions using Java, Spring Boot, Python, C++, C#, and TypeScript. Knowledgeable in algorithms, data structures, object-oriented programming, databases, and software development methodologies. Quick to learn new technologies and adaptable across software engineering, technical analysis, systems development, and technology-focused roles. Passionate about building efficient, reliable solutions and continuously developing technical and professional skills.

SKILLS

Technical Skills	Frontend: HTML, CSS, JavaScript, TypeScript, Tailwind CSS, React JS, React Native, Next JS., Backend: Spring Boot, Java, C, Python, C++, C#, Node JS, MySQL, MongoDB, Tools & Platform: Git, GitLab, GitHub, Firebase, Docker, Kubernetes, Clerk VITE, EXPO, Rapid API, Postman, Bootstrap, Figma., Methodologies: Agile, with a focus on collaboration and adaptability, Test Automation, REST API Development, Microservices Architecture, Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Design, Computer Architecture, Software Security.
Soft Skills	Communication skills, Teamwork, Decision making, Project planning, Time Management

EXPERIENCE

IT and System Support Intern	June-August 2022
TVS Motors	Karaikal, Pondicherry, India
- Provided technical assistance for showroom systems, software, and internal tools - Assisted in maintaining digital records, inventory systems, and operational databases - Helped analyse and organise business data using spreadsheets and reporting tools - Supported staff with troubleshooting technical and system-related issues. - Gained experience working in a professional team environment with operational technologies.	
Retail Assistant	April 2024 - Present
GREGGS	Cambridge, United Kingdom
- Delivered excellent customer service in a fast-paced retail environment. - Developed strong teamwork and communication skills through daily customer interactions. - Managed multiple responsibilities efficiently while maintaining high operational standards. - Demonstrated adaptability, problem-solving, and time management in a busy workplace - Collaborated with colleagues to ensure smooth day-to-day operations.	

EDUCATION

Bachelor of Science In Computer Science, Anglia Ruskin University,	September 2023- August 2026 (Expected)
Relevant Coursework: Relevant Coursework: Introduction to Programming, Operating Systems, Computer Systems, Software Principles, Core Mathematics for Computer Science Data Structures & Algorithms, Digital Security, Network Routing, Computer Research Methodology, Software Engineering, Database Design & Implementation, Cloud Computing, Image Processing, Artificial Intelligence, Professional Issues: Computer & Society	
St. Joseph Of Cluny Hr.Sec. School, Higher Secondary(GCSE)	May 2022
Grade: 80%	
Relevant Coursework: Achieved 80% in Higher Secondary Education, demonstrating strong academic performance and consistency across subjects. Maintained strong academic standards throughout secondary and higher secondary education. Demonstrated analytical and problem-solving skills through academic coursework. Developed strong quantitative and logical reasoning abilities through mathematics and science subjects Successfully balanced academic responsibilities while maintaining consistent performance. Recognised for commitment, discipline, and dedication towards academic development.	

PROJECTS

EasyFind – Local Professional Discovery Application — WEB Development
Building a full-stack application connecting users with local professionals through radius-based search functionality

- Designing backend APIs and database structures to manage user, professional, and review data efficiently
- Developing responsive frontend components focused on usability and user experience.
- Applying software engineering principles including clean architecture, modular design, testing, and version control

University Project — Full-Stack Web Application for Together Culture — Web Application

Technologies: JavaScript, Node, RestAPIs, MySQL, Git, Unit testing

- Part of a university team that achieved 1st rank for developing a full-stack web platform for Together Culture.
- Developed frontend and backend functionality using Java, applying object-oriented programming and software engineering principles.
- Built responsive UI components and implemented backend services, application logic, and data management features
- Collaborated on database integration, testing, debugging, and system optimisation to improve performance and reliability.
- Used version control and Agile collaboration practices to coordinate development within a team environment.
- Focused on writing maintainable, scalable, and clean code while meeting project deadlines and client requirements.
